## Civil Engineers and Architects,

No. 435 Chestnut St.  
Philadelphia, Pa. April 18 1887.

Hon. Danl. W. Fox  
Sup't U.S. Mint. Philad.  
Dear Sir.

I would respectfully call your attention to the fact that one of pipes supplying water from the City mains on S. Penn square, to the Mint must be repaired.

This pipe has no doubt been in the ground for many years it should have been relaid when the new pavement around the Public Buildings was put down, this seems to have been overlooked by your predecessor, and he comes a legacy which has been brought to light in making the excavations for the New Boiler House &c &c.

Notwithstanding the care that was exercised during the excavations, this pipe was so destroyed by rust that it burst and flooded out the workmen. the pipe was plugged up and is now in that condition. To avoid further trouble and prevent the City cutting off this source of water supply from the Mint, the officials of the Water Department should be consulted and the old pipe taken up and a good one relaid. This should be done at your earliest convenience to avoid conflict, damage & loss.

Will you kindly inform us if the operations of the Mint require the old well now in the proposed engine room. we understand that you have entirely supplemented its use by new settling tanks just constructed.

Respy. Wilson & Co. D.

Hon. Danl. M. Fox  
Supt. U. S. Mint. Philad.

Dear Sir.

We would respectfully call your attention to the fact that one of pipes supplying water from the City—main on S. Penn square, to the Mint must be repaired.

This pipe has no doubt been in the ground for many years it should have been relaid when the new pavement around the Public Buildings was put down, this seems to have been overlooked, by your predecessor, and becomes a legacy which has been brought to light in making the excavations for the New Boiler House &c &c.

Notwithstanding the care that was exercised during the excavations. this pipe was so destroyed by rust that it burst and flooded out the workmen. the pipe was plugged up and is now in that condition. To avoid further trouble and prevent the City cutting off this source of water supply from the Mint, the official of the Water Department should be consulted and the old pipe taken up and a good one relaid. This should be done at your earliest convenience to avoid conflict, damage & loss.

Will you kindly inform us if the operations of the Mint require the old well now in the proposed engine room. We understand that you have entirely supplemented its use by new settling tanks just constructed.

Respy.
